Offering 17 Spring Bred Cows

MCCORMICK

FUNDAMENTALLY *Reds* FOCUSED

2025 PRIVATE TREATY *female sale*

WELCOME TO OUR 2025 FEMALE OFFERING!

Thank you for considering the bred females in this offering and for your interest in learning more about our program. We're proud to present this group of females—some of which represent more than twenty years of breeding, selection, and commitment to improvement—and we believe in their ability to positively impact your herd.

Our focus at McCormick Reds is breeding fundamentally sound Red Angus cattle. We emphasize fertility, mothering ability, structural soundness, fleshing ability, temperament, and optimal mature cow size in our herd. We prioritize increasing growth and carcass productivity, but never at the expense of the fundamentals. We believe a fundamentally focused breeding program gives our commercial customers the greatest opportunity to be profitable in any market condition.

The females in this offering represent a cross-section of our herd. Most are coming three-year-olds that have proven themselves by calving unassisted, nurturing a calf, and breeding back in a timely manner. Thanks to a strong breed-up this year, we're also able to offer several AI pregnancies in addition to the cows bred via natural service.

This catalog contains the key information you'll need, but if you have any questions, would like more details, or want to view the cattle, please don't hesitate to reach out. One of the most rewarding parts of this business is building relationships with fellow cattlemen, and we're always glad for the opportunity to connect.

We appreciate your interest and look forward to visiting with you.

Sincerely, *Paul & Jackie McCormick*

PAUL MCCORMICK

MCCORMICKREDS.COM

DOCILITY

We place an emphasis on raising docile cattle that are enjoyable and safe to work with. While temperament can vary among individuals, we believe it's important to be transparent and consistent in how we evaluate it.

All cattle in this offering have been scored on a 1–5 scale based on observed behavior during daily handling. Cattle scoring 1 or 2 are not acceptable in our program and have been culled accordingly.

Here's how to interpret the scores:

- 3 – Calm and manageable in a group setting but may become nervous or flighty when isolated.
- 4 – Easy to work with both in a group and individually.
- 5 – Exceptionally docile cattle that are friendly, approachable, and may even allow you to scratch them in the pasture

FRAME SIZE

Our breeding objective is to produce medium-sized cows that thrive in real-world conditions. While we have not taken formal frame score measurements on the cattle in this offering, each animal has been visually evaluated and assigned a size designation based on our experience and judgment.

We use the following simple scale to describe frame size:

- "–" = Below average for frame size
- "0" = Average frame size
- "+" = Above average for frame size

This system is intended to give you a quick reference. If you have questions about how an individual animal fits into your environment or management system, we'd be happy to visit with you.

Sale Information

TERMS OF SALE

Payment must be made by cash or check. Cattle will not be released until full payment has been received.

HEALTH

Females have been annually vaccinated with Virashield VL5HB and Scour Bos. Females will be vaccinated with Virashield VL5HB, dewormed with Safeguard, and poured with Eprizero prior to leaving.

DNA TESTING

All cattle have been DNA tested to provide genomically enhanced EPDs and confirm parentage. Any animal identified as having a known genetic defect within the first three generations has been tested and confirmed negative for that condition.

DELIVERY INFORMATION

Free delivery is available within 300 miles of the farm. For destinations beyond that range, we will do our best to assist in coordinating transportation arrangements.

COMMERCIAL DISCOUNT

A \$250 discount will be applied to the sale price of each female if registration papers are not required.

PREGNANCY INFORMATION AND GUARANTEE

All females have been ultrasounded by our veterinarian. The due dates, embryo sexing, and other pregnancy-related details listed in this catalog are our best estimates and are not guaranteed. Pregnancy status will be re-confirmed by our veterinarian prior to the female leaving our farm.

We do guarantee that bred females are pregnant at the time of sale. However, we cannot guarantee the delivery of a live calf.

If you have concerns regarding the pregnancy status of a bred female upon arrival, you must notify us within 30 days of receiving the animal. A refund request must be accompanied by documentation from a licensed veterinarian confirming that the female is not pregnant.

Rushmore was the high-selling bull from the 2024 Rhodes Red Angus bull sale. Rushmore offers a unique pedigree, fleshing ability, maternal function, and real-world pounds in a medium-sized package. His dam, Copperqueen 9023, records 4 @ 107 WR with a 364-day calving interval. His first calves came moderate for birth and were near the top at weaning time!

Testify is the Township son that we will move forward with. We appreciate the calf vigor, medium size, and maternal function that Township brought to the table. We believe that Testify offers all the traits we value from Township with more size, scale, and performance while maintaining breed character. His dam, Holly 7736, records 7 @ 101 WR with a 362-day calving interval.

6024 was a bull that we raised in my dad's herd. This bull stems back to one of the original cows that my parents purchased from Garth and Nancy Griffin in the fall of 2003. The daughters have been productive, fertile, and possess great maternal instinct. He is the maternal grandsire to Rushmore and Marshal. We decided to go back and use this proven sire again.

3346 came to us from the Rhodes Red Angus program. This black-hided bull offers an outcross pedigree, maternal integrity, and hormonal balance. He stems from the foundation female, Basin Primrose 4167 (aka Y407).

Marshal is a 7/8 brother to Rushmore. He claimed the heaviest actual weaning weight of the 2024 calf crop. He is extremely similar in his design to Rushmore. Marshal's dam, Juana 9003, records 4 @ 109 WR with a 364-day calving interval.

Cow Families

REBELLA

The Rebellas originated from Hamilton Ranches in Twin Bridges, MT. In the fall of 2013, my dad and I had the opportunity to purchase choice of their registered herd on a potload of cows. L145 was purchased as a 12-year-old cow. She produced until she was 16. L145 recorded 15 natural calves with a 95 BR and 103 WR and a 369-day calving interval. 7039 is her last daughter and follows in her footsteps with functional type and records seven calves with a 91 BR, 98 WR, and a 370-day calving interval. The Rebellas offer maternal function and longevity.

OPHELIA

The Ophelias are another Hamilton cow family. 5109 rose to the top as one of the best females we purchased. She was a unique Cherokee Canyon daughter, offering more size, length, femininity, and foot quality. She produced 10 natural calves with a 100 BR, 103 WR, and a 372-day calving interval. We flushed her to Cinch before we sold her. That flush has had a major impact on our herd. The Ophelias balance maternal performance while being some of our top performers in the feedlot.

GILDA

Gilda P4129 was the first cow that I purchased. She was a foundational cow to our program. She liked to have bull calves, so her daughters were limited. 4129's daughter, by Bushwacker, was exceptional. For us, she was ideal for size, structure, and performance. Her granddaughter by Rollin Deep, Gilda 6142, offered everything we appreciated about her mother in a red package. The number of Gildas in our herd has gone from limited to plentiful, and we are now able to offer them to you.

ONORA

The Onoras are the first Red Angus cow family that I owned. This cow family stems from a show heifer that my dad gave me. The Onoras are feminine, productive, and offer more size and scale than some of our other cow families.

LAKOTA

The foundation of the Lakota cow family is AHF Lakota 837U. We purchased Lakota 837U as an aged cow from Hamilton Ranches. We appreciated 837U's maternal and structural integrity. She recorded 10 natural calves at 95 BR and 100 WR with a 371-day calving interval. Roll On is a direct son of 837U that we are using to continue her lineage. The Lakotas offer great maternal function.

HOLLY

The Holly cow family developed from a Glacier Logan 210 daughter that my parents purchased in 2004. They were a cow family that I felt we needed to acquire when we started our own herd. 7736 was purchased in the fall of 2018 to accomplish this goal. She has since established herself as a matriarch in our herd. 7736 records 7 @ 101 WR with a 362-day calving interval. She maintained this calving interval while generating a conventional flush that produced Testify. The Holly cow family maintains maternal function in a slightly larger package.

ERELITE

This outcross cow family is full of Black Angus lineage. The Erelites offer consistent structural integrity, high-quality udders, and great dispositions.

BRANDI

We have worked with the Brandi cow family directly and indirectly since 2007. They have a great balance of production and maternal ability. The pedigrees in this cow family are stacked with proven performance sires.

FAYET

The Fayets originated from Glacier Red Angus in Montana. This was another established cow family we felt would benefit our program. The Fayets have a refined, maternal look, and they produce accordingly.
